## Chapter Director

## Assistant Director

### Welcome to Summer!!

**H**ave we had some great riding weather, or what? OK so it's been a little on the hot side but at least it's not cold and snowy! We've had quite a few good weekend trips so far and there are many more planned for this year. I hope to see all of you out there riding.

Greg and Dee Eames, CD

As I'm writing this I am sitting in a hotel room in Louisville Kentucky. Dee, the kids and I are on our way to Texas for a two week vacation so I'm not going to write a long article.

See you on the road!!

**I** remember that day well, I was traveling to the local drug store and as soon as I pulled into a parking spot I was surrounded by a collection of small pickup trucks. The date was in the mid-70s, the place was Southern California. The current gas crisis was causing a lot of custom car aficionados to trade in their large custom surfer van and replace them with the latest craze – The mini Truck. I believe Toyota was the first but Datsun imported a model soon after. The American brands took a while longer to catch on. These trucks were all over Southern California in a variety of different forms of customizations, jacked up 4 wheel drive (not factory), or low to the ground with super wide tires the differences were unlimited. I had recently purchased a Datsun and a week earlier replaced the stock skinny tires with US Indy mag wheels and tires. M 50s on the rear and something skinnier on the front. My new found parking lot friends were wondering if I would be interested in joining their Mini Pickup Club, Datsuns Limited. They handed me a flyer and I gave them a promise that I would try and attend one of their meetings.

Larry Helber, ACD

That was when I learned the value of belonging to a group who shares the same interests. From my membership in that group I learned when and where the Rallies where we always had a good time and enjoyed collecting another Dash Plaque. I also learned how to lower the front end and raise the backend so the truck

Kymer's Camping Resort  
69 Kymer Road, Branchville NJ 973-875-3167

Panther Lake Camping Resort  
6 Panther Lake Rd, Andover NJ 973-347-4444

*Camp Grounds, cont. page 4*

# Recipe of the Month

## Greens and Beans

- 1 tsp Chopped garlic or 2-3 cloves
- 3 Tbl Olive oil
- 1 Cup (15 oz) Can Cannelini beans (white)
- 1 Bag Escarole
- 1 Cup Chicken broth
- Salt and pepper to taste
- A little crushed red pepper
- Sprinkle with Parmesan cheese

Joanne Johnston

Wash and cut up escarole par boil in a big pot of boiling water, meanwhile in a frying pan, add your olive oil and garlic and saute. Add chicken broth and escarole, add salt and pepper and a little crushed red pepper if you want a little spice. Cook down. Drain beans and add to pan. When serving sprinkle with Parmesan cheese.

Delish! I like to add a little more garlic! Yum!

### Camp Grounds, from page 3

Pleasant Acres Farm Campground  
61 Dewitt Road, Sussex NJ 973-875-4166

Rockview Valley Campground Resort  
59 River Road, Montague NJ 973-293-3383

Stokes State Forest

## Motorcycle Tire School - Tire Safety and Care

by Jim Pearson, Chapter Educator

### Tire Inflation

Always keep the motorcycle manufacturer's recommended air pressure in both tires. This is an important requirement for tire safety and mileage.

**Jim Pearson**  
Rider Educator

Your motorcycle owner's manual will tell you the recommended cold inflation pressure. On some motorcycles, the recommended front and rear tire pressures will be different. The pressures stamped on the sidewall of the tire are only for maximum loads. On some occasions,

these pressures will also be the manufacturer's recommended settings as well.

Riding on tires with too little air pressure is dangerous. The tires will build excessive heat. This can cause a sudden tire failure. Under inflation may also:

- Damage the tire, leading to tire failure
- Adversely affect vehicle cornering
- Reduce tire life
- Increase fuel consumption
- Cause fatigue cracking

Riding on tires with too much air can be dangerous. The tires are more likely to be cut, punctured, or broken by sudden impact. Do not exceed the pressure indicated on the tire sidewall. Consult your owner's manual for the recommended inflation and other tire information. Never inflate a tire unless it is secured to the motorcycle or a tire-mounting machine. Inflating an unsecured tire is dangerous. If it bursts, it could be hurled into the air with explosive force.

### Valve Stems, Cores & Caps

Old or damaged valve stems and cores may cause air loss. Replace them when mounting new tires. Use caps (finger tight) on the valve stems to keep dust, dirt, and moisture away from the valve.

### Matching Front and Rear Tires

Correct matching of front and rear tires is critical to obtaining optimum performance and handling. Never mount a rear tire in front or vice versa. Combining a new tire with a worn rear tire may cause instability. Always consult your manufacturer before modifying your motorcycle's tires from stock.

### Checking Tire Inflation

Check your tire air pressure at least once a week and before long trips. Be sure to use an accurate pressure gauge. Check your air pressure when the tires are "cold." The tires are "cold" when your motorcycle has been ridden less than a mile at moderate speed or after being stopped for three or more hours. Never release air from a hot tire in order to reach the recommended cold tire pressure. Normal riding causes tires to run hotter and inflation pressure to increase. If you release air when your tires are hot, you may dangerously under inflate your tires. If your tires lose more than two pounds per square inch (2 psi) per month, the tire, the valve, or wheel may be damaged. Consult your local dealer for an inspection. Use valve caps to keep valve cores clean and clear of debris and to help guard against air leakage.

### Break-in Period

In order for your new tire(s) to provide optimum performance, tires should be ridden very cautiously for the first 100 miles in order for the tread surface to be "Scuffed-In" and work properly. Directly after new tires are mounted, sudden acceleration, maximum braking, and hard cornering must be avoided. This will allow the rider to adjust to the feel and handling characteristics of the new tire and for the new tire to be "Scuffed-In" correctly in order to achieve optimum grip level.

### Tire Loading

Riding your motorcycle in an overloaded condition is

"Honest People, Honest Service, Honest Results"

**Almost** Every month we will feature a "youth" picture of one of our members in the Winger. The pictures will be drawn at random from sub-missions received. By youth I mean average age of 4-10. Baby pictures are really hard to identify. Each correct guess received will win a ticket to a monthly drawing for a \$5 prize. The person whose picture it is will also get a ticket. The drawing will be held at the monthly gathering. Please send all pictures and guesses to [GOOFYFXR@ROCHESTER.RR.COM](mailto:GOOFYFXR@ROCHESTER.RR.COM) or Greg Eames at 446 Pitts.-Henr.T.L.Rd., Pittsford, NY 14534.

Greg didn't send me a picture for this month. I guess any name you submit will be right.

June's picture was Al Skiles. No right guesses as far as I know.

### **Rider Ed., from page 5**

dangerous. Overloading causes excessive heat to build up in your tires. This can lead to sudden tire failure while the tire is overloaded or at some later date. Consult your motorcycle owner's manual for the motorcycle load limits and proper tire inflation that applies to your motorcycle and tires. Never exceed the maximum load rating stamped on the tire sidewall of your tire or the maximum vehicle load rating, whichever is less. Before a trip, determine the total weight of luggage, equipment, and rider(s) to be added to your vehicle. Never exceed the accessory restrictions and motorcycle load capacity found in the owner's manual, or the maximum load molded on the sidewall of the tire.

### **Tire Damage**

Riding on damaged tires is dangerous. A damaged tire can suddenly fail. Have your tires regularly inspected by your local dealer for damage.

### **Spotting Damaged Tires**

After striking anything unusual in the roadway, ask your local dealer to demount the tire and inspect it for damage. A tire may not have visible signs of damage on the tire surface. Yet, the tire may suddenly fail without warning, a day, a week, or even months later. Inspect your tires for cuts, cracks, or splits in the tread and sidewall areas. Bumps or bulges may indicate a separation within the tire body. Have your tire inspected by a qualified tire service person. It may be necessary to have it removed from the wheel for a complete inspection.

### **Tread Depth**

Inspect your tires for adequate tread depth. When the tire is worn to the built-in indicators at 1/32nd inch (0.8 millimeters) or less tread groove depth, or the tire cord or fabric is exposed, the tire is dangerously worn and must be replaced immediately. Inspect your tires for uneven wear. Wear on one side of the tread or flat spots in the tread may indicate a problem with the tire or vehicle. Consult your local dealer. Inspect your rims also. If you have a bent or cracked rim, it must be replaced.

I'm heading for

**READ'S**

ACD, from page 1

would look better but not become unsafe. I found friends to help with fiberglass and body work and who to go to for custom paint. Over the years as my interests may have changed but one thing has always stayed the same, I have always benefited by being an active member. When I moved the to the desert, joining an off-roading club showed me the best places to travel and gave me some security while traveling if I got stuck or broke down. While trap shooting it was nice to be able to try out the different shot guns before making a purchase plus it was good being connected for the best deals. Usually the more active I am the more I benefit from it.

When I purchased my Gold Wing I had already been a member of GWRRA for a couple of weeks and it wasn't much longer afterwards I found you, the members of Chapter NY-W. Over the past years you have not disappointed me. I have learned many pointers and tips about repairing and maintaining my Classic Wing. You have shown me many great riding roads and destinations. My wallet is happier from the savings I have seen from savvy purchasing advice and great deals on used equipment. My membership is a great bargain just from the above lessons received.

The best part of being an active member of GWRRA is all of the great friends I've made over the years. I am looking forward to the many opportunities we have to travel and socialize this riding season. My wish to all of you, my dear friends; ride safe, have a great time and return home so we can have a great time talking about it later and then doing it again.

## New York District GWRRA Region B

### 2012 Dash for Cash

*(Only Chapters assigned to the NY District can compete in the 2012 Dash for Cash Program)*

New York District GWRRA "Dash for Cash" has entered its fifth year – its purpose is to encourage Chapters to visit each other, to participate in GWRRA Programs, and to attend conventions and other functions within the Region and beyond.

The New York District will pay the charter fee for the year 2013 for any chapter attaining 20 points.

Points may be earned from January 1, 2012 through November 15, 2012.

The chapter with the most points in excess of 20 at the end of the program period will also be awarded a check for \$100.00.

# New England Convention - 2012

## “The Roaring Twenties”

Come join us for a trip back to "The Roaring Twenties", a time of Prohibition, Speakeasy's, Flappers, Gangsters and more!

This is our "Theme" for the Friday Night Ice-Cream Social, so put on your Fun Face, and Costume and join in all the fun and craziness!

We have lots of Seminars, Scenic Rides, Couple of the Year (Region) Selection and More!

If you have not signed up already, please do so, we don't want anyone to miss out on all the Fun at the New England Convention this year.

This is the first time in 11 years that we have raised the registration prices as we know how the economy has effected everyone, everywhere.

We hope to see you in Rutland VT in July, the 26th - 28th!

We will be meeting this weekend to finalize the Schedule and will have more info soon.

Thanks,

The NE Convention Staff;  
Allen & Claudette Cyr ME DD  
Kevin & Georgia Leblond MA DD  
Pat & Dick Thibaudeau NH/VT DD  
Judy & Bob Burns CT/RI

## Registration for the 2012 NY/NJ Bi-State Convention is now open

**W**e are excited to announce that registration for the 2012 NY/NJ Bi-State Convention is now open. We are happy to announce that we are able to keep this year's fees the same as they were last year, while maintaining the same level of event quality.

The aim for the 2012 NY/NJ Bi-State Convention is FUN, FUN, FUN. You will have access to great riding throughout the scenic areas of northern New Jersey, southern New York, and eastern Pennsylvania and numerous local attractions with guided rides planned to a few of them. The Medic First Aid Basic Plus is being offered along with a variety of new Rider Education, Leadership Training, and life skills seminars.

A number of vendors will be present and will be located on the premises of the host hotel. Enhancing the FUN factor are terrific activities and entertainment that are being planned for both Thursday and Friday evening. It will be lots of FUN to gather with friends after all of the day's activities for an evening of good old fashioned camaraderie and laughs! More information about this FUN event, including the registration form will be available on the NY District website soon.

See you there!  
 Paul & Suzette Wood, GWRRA NY District Directors  
 Steve & Judy Smith, GWRRA NJ District Directors
